JavaScript, TypeScript, Java, Dart, React, Redux, SAPUI5, Flutter, HTML, CSS, SQL, Databases, Git, Docker, AWS, Azure, DevOps Principles, Agile methodologies (Scrum, Kanban), User Experience, Figma.

WORK EXPERIENCE

Neomore Consulting Oy

August 2023 - Present

Consultant Hybrid

- Advanced from Junior Developer to Consultant through hands-on mentorship, progressively taking on greater responsibility and technical ownership.
- Collaborating closely with different project teams to deliver real life working solutions aligned with high standards and best practices.
- Developed full-stack Root Cause Analysis tools for customers in the forestry and production industries using AWS, React, Java, and Node.js, working in agile teams with regular client collaboration.
- Lead and designed frontend development of a Goods Receipt solution for a customer built with SAPUI5.
- Provided AMS support for a live solution managing and resolving tickets in a timely manner.
- Enhanced and maintained an existing Intercompany Reporting application built with SAPUI5, implementing detailed feature updates and improvements.

Experis Academy Finland

January 2023 - May 2023

Software Developer Hybrid

- Experis Academy's Java Full Stack program starts with a tailor-made course that lasts for 3 months. Accelerated learning period combines theory and practical case work.
- Learning and deepening skills with different languages and frameworks such as Java 8, Spring, REST, SOAP, SQL, Docker, Scrum, JavaScript, React, Angular, HTML5 and CSS.

EDUCATION

Haaga-Helia University of Applied Sciences

Business Information Systems - Graduated: December 2024

PROJECTS

GymBro | Next.js, React, TypeScript, Tailwind CSS

- Developed a gym progress tracking application with Next.js and React, focusing on reusable components and responsive UI development.
- Created four core views for home, workout management exercise browsing and user profiles.
- Implemented workout creation and workout history functionality, allowing users to review previous training sessions.
- Developed a profile dashboard for presenting user training statistics and progress.

CV Page | HTML, CSS, Bootstrap, GitHub Pages

- Designed and developed a responsive personal portfolio website to showcase professional experience, technical skills, education and certifications.
- Built the website using HTML, CSS, and Bootstrap with a focus on responsive design and clean user experience.
- Deployed and maintained the portfolio using GitHub Pages.

Menu Mate | SAPUI5, Azure Functions

- Built an application for viewing lunch menus around the Leppävaara area.
- Implemented menu fetching and created the application for use by colleagues.

Root Cause Analysis Application | React, TypeScript, Java, AWS, Node.js

- Developed full-stack Root Cause Analysis tools for customers in the forestry and production industries.
- Worked in agile teams with regular client collaboration to deliver solutions aligned with customer requirements.

Goods Receipt Solution | SAPUI5, JavaScript

- Led and designed frontend development of a Goods Receipt solution for a customer.
- Collaborated with project teams to deliver a working customer solution.
